ABOUT ME

Hello, I'm Aanchal Desai , an aspiring computer science engineering student who is always looking forward for improvement and learn new things.

PROJECTS

RECRUITMENT MANAGEMENT SYSTEM

Created Recruitment Management System using Technologies **PHP & MYSQL.** It help the job seekers to find a job with their interest . It also makes the process easier for the recruiters.

AUTOMATIC DOORBELL(FOR COVID SAFETY)

Created an hardware based   Automatic Doorbell using **ARDUINO** , which helps in maintaining the safety (especially during covid)of the people in the house by spraying sanitizer on the person outside the house by detecting their height

RESUME BUILDER

created a web based automatic resume builder   using technolgies like **HTML, CSS, FIREBASE, JAVASCRIPT**, which helps the user to create their resume and also help them prepare for the interview questions.

EXPLORATORY ANALYSIS OF GEO-LOCATIONAL DATA

The aim of this   project is to use **K-Means Clustering** to find best accommodation of students around their college by classifying accommodation for incoming students on the basis of their preferences on amenities, budget and proximity to the location.
